One of the most illuminating things in this handbook is the explication of Africana Womanism, named & defined by Clenora, which is a concept designed for all women of African descent. As a seasoned social, cultural & political thinker, she's wholly unafraid of any worthy fray or controversy as was Till for her. Yet there is another component to this intellectual warrior's makeup, which runs through her writing as it does her life—the notion of the redemptive spirit. In Clenora's view, the shelf-life on hatred has expired. It's time to usher in a new era, built on the ideals of remorse, atonement, forgiveness & reconciliation. With redemption as our goal, grace returns, hope endures & life regains its promise--Things worth fighting for.
