Connect to Bengal on Mac OS 10.5 Using Connect to Server

Solution:

Details:

CAUTION: This is only recommended for on campus use. If off campus you will need to use the VPN Client to connect to Bengal using this method

1. From the Doc, click **Finder**.
2. From the menu bar, click **Go**.
3. Select **Connect to Server**.
4. Type `smb://bengal.missouri.edu/yourpawprint` in the Server Address box, where *yourpawprint* is your university Active Directory user name.
5. Click **Connect**.
6. Type `domain\pawprint` in the **name** box.
 - If you are a student, use domain `tigers`.
 - If you are a faculty or staff member, use domain `umc-users`.
7. Type your password in your **password** box.
8. Click **OK**.
